#### Selling and Administrative Expenses Analysis by Segment

- Supermarkets selling and administrative expenses increased S/. 18 million, or 11.0% in the first quarter of 2013 compared to the same period in 2012, increasing from 22.8% to 23.6% as a percentage of supermarkets revenues. The main factors that impacted our supermarkets selling and administrative expenses were an increase of the minimun wage by 11.1% in June 2012, and having 10 new stores with less than 6 months of operation (8 new stores in the last quarter of 2012 and 2 new stores in the first quarter of 2013). As these stores continue their ramp up period, logistic and operation expenses get diluted.
- Pharmacies selling and administrative expenses grew S/. 18 million, or 23.5% in the first quarter of 2013 compared to the same period in 2012, due to higher store, logistics and warehousing expenses due to the new stores opened. As a percentage of pharmacies revenues, selling and administratives expenses increased from 20.2% in the first quarter of 2012 to 23.0% in the same period of 2013, due to 107 new stores with less than 6 months of operation (77 additional stores in the last quarter of 2012 and 30 additional stores in the first quarter of 2013). As these stores continue their ramp up period, logistic and operation expenses get diluted.
- Shopping centers selling and administrative expenses increased S/. 5 million, or 66.3% in the first quarter of 2013 compared to the same period in 2012.
  The increase in selling and administrative expenses in the shopping centers segment is mainly explained by the opening and operation of Real Plaza Huánuco and the expansion of 8 shopping centers since the first quarter of 2012. In addition, as a consequence of the corporate restructuring concluded in August 2012, we included the real estate team expenses previously spread across different related entities.

Intercompany transactions are eliminated upon consolidation of our financial statements.

Consolidation adjustments caption represents the necessary amounts that are included in the consolidation process for the subsidiaries' financial statements in order to show them as a single entity instead of separate business units.

InRetail's other operating income (expenses), net, resulted in an income of S/. 12 million in the first quarter of 2013, compared to an income of S/.0.1 million in the same period in 2012, mainly due to S/. 10 million paid by *Tarjeta Oh!* to be allowed to offer exclusive promotions in our supermarkets, in similar terms and conditions as *Tarjeta Vea*.

Other operating income is also generated in our shopping centers segment due to increases in the fair value of investment properties determined in accordance with IFRS.
